

Vertically integrated within Jabil, the world's most technologically advanced manufacturing solutions provider, we provide end-to-end strategy, engineering, and product development solutions. We are committed to helping you create and deliver meaningful solutions for your products, services, and experiences. Backed by deep manufacturing experience, our expert teams help you decide what to do and why, then help develop and scale your solution through its full lifecycle management and commercialization.

We have experience working across the following areas within healthcare:

Helping our clients define **What to Make + Why** and **How to Make + Scale It**

- Strategy & Planning
- Research & Human Factors
- Industrial Design
- User Interface & Experience (UI/UX)
- Conceptual Engineering
- Quality Engineering

- Supplier Quality Engineering
- Supply Chain Management
- Value Engineering
