

In pursuing a manufacturing partner, Jabil stood out for its half-century of automotive and transportation experience along with more than a decade of proven expertise in electrified vehicle technologies. A strong track record of scaling production of power and charging technology also differentiated Jabil from other manufacturing solutions providers.

With a global, flexible IATF-certified manufacturing footprint, Jabil is ideally suited to support customers facing rapid growth. Additionally, Jabil's Value Analysis & Value Engineering (VAE) solutions balance cost and performance to deliver the most market impact. The success of this approach is quantified by more than one million expeos27.9 ((e)0s5.31.1 (

EVBox maintains unwavering confidence in Jabil's global supply chain intelligence, along with best practices for procurement and commodity

ISO 45001 OH&S certifications for occupational health and safety standards. "Not only is Jabil in line with our zero-emission and sustainability achievements," Elshout adds. "They follow best practices for quality and safety."
